## QCCA Package Details

### Adastra Music System with wireless microphone (Gold/Silver)

Our new state of the art music system is compatible with all new modern devices it can be connected via AUX, Bluetooth, SD card and RCA inputs. Its user friendly so there is no complicated setting it's truly a plug and play system, the system was designed so any novice user can use it.

To use the microphone you simply switch it on this was also created to be user friendly.

Our music system has 4 zones so you can decide where you can play the music within the hall.

### Starlight Curtains (Gold)

We are one the few community halls to have installed Starlight curtains, our curtains consists of fifteen thousand blue and white LEDs lights with a white background.

### Round Wooden Banqueting Table (Gold/Silver)

Our new Round Wooden Banqueting Table will be suitable for any event without the need of a table cloth, the round wooden beach effect table has a high gloss varnish that is foldable and can be moved around to suit your need. You can sit between 8 to 10 people comfortably.

### Blue Banqueting Chair (Gold/Silver)

Our lightweight aluminium frame Banqueting Chair is upholstered with navy blue. The lightweight frame makes it easy from them to be moved around the hall.

### Kitchen (Gold/Silver)

Our industrial kitchen has 2 ovens and 8 gas burners and 2 sinks with 2 serving windows. There is ample of space of worktops to serve from. We also have a separate hand washing sink.

### 6ft Tables (Bronze)

Our 6ft table can sit around 10 to 12 people comfortably, they are heavy duty and robust and will be suitable for any event.

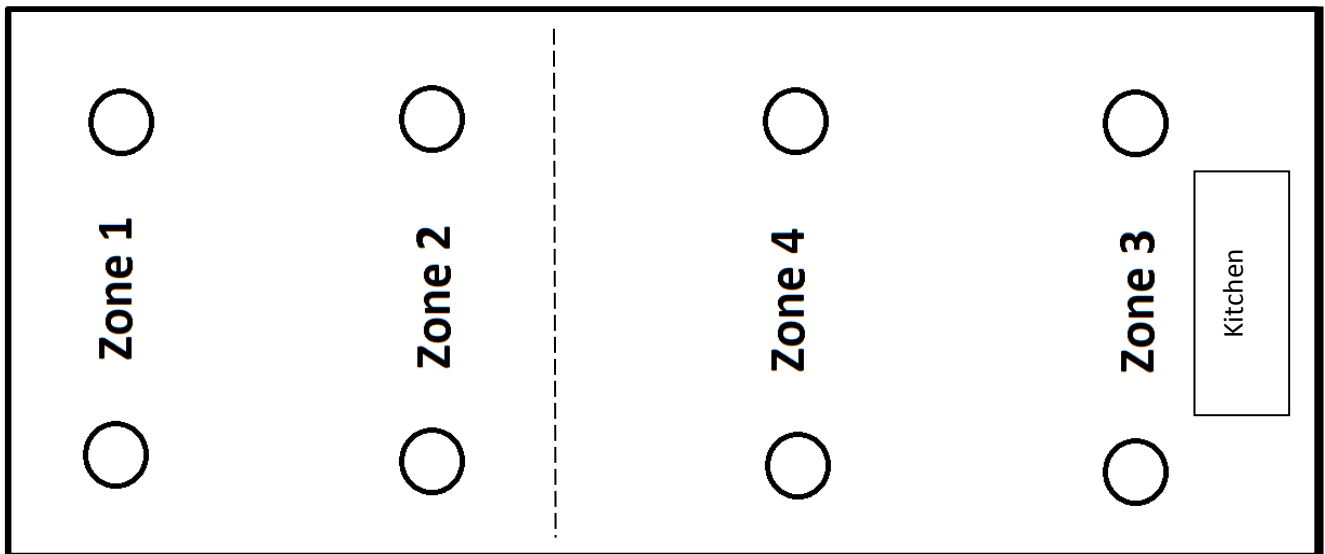

### Red Chairs (Bronze)

We have over 120 red chairs to suit any very large events and light weight to be moved around.

### 8ft Rectangle Plastic Folding Table

Our plastic folding tables use high quality moulded plastic which allows for a stronger more durable table and can sit between 8 to 10 people comfortably.

Adastra Music System with wireless microphone user guide

Source Input

AUX

Bluetooth

SD card

RCA inputs

USB

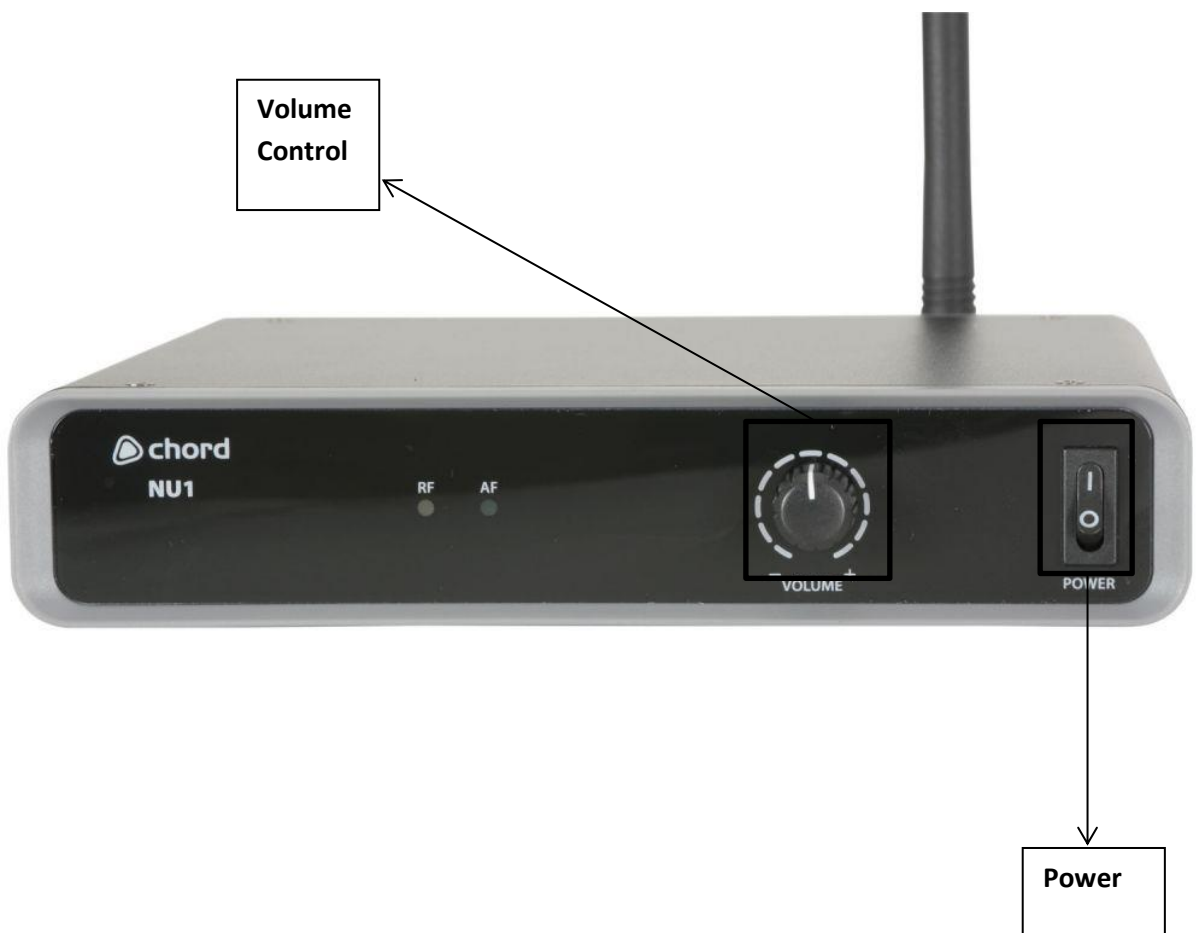

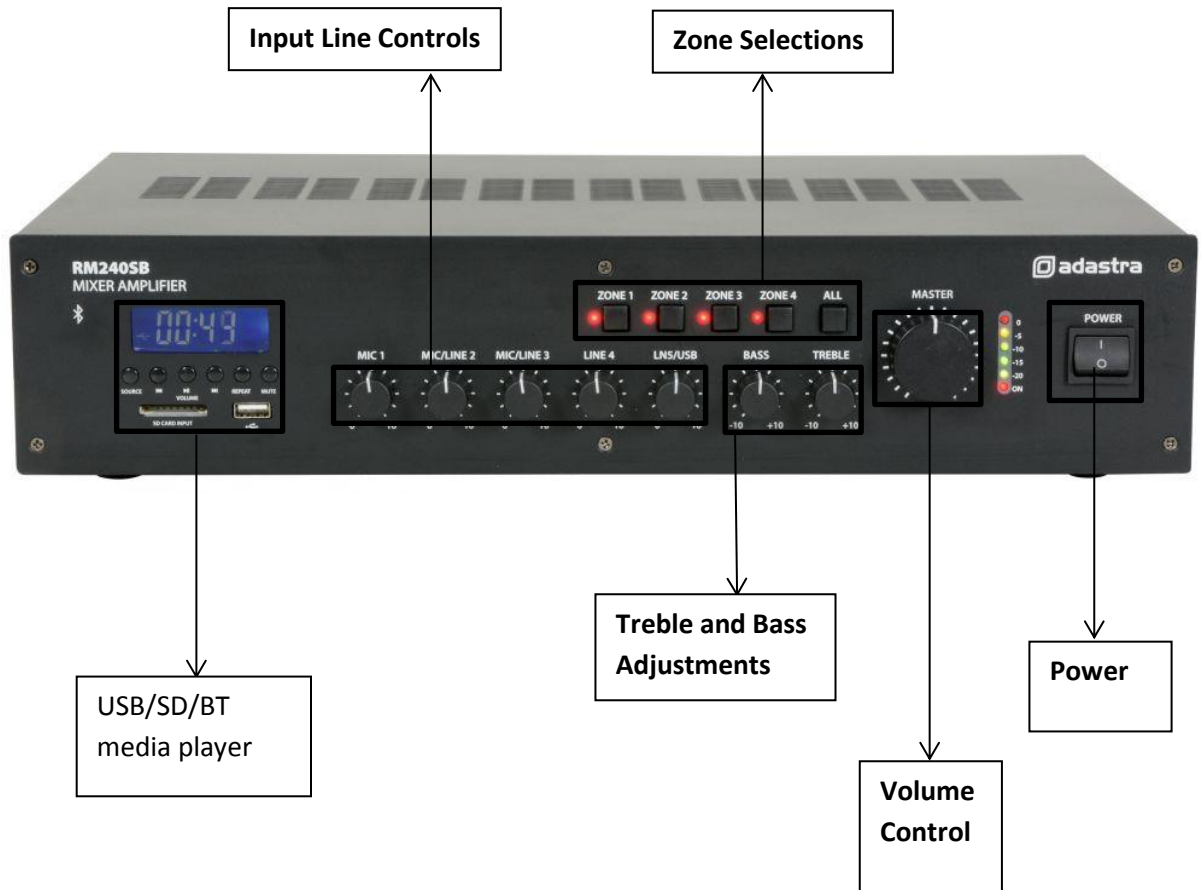

Bluetooth

The Bluetooth function allows connection of a smart phone or tablet to the media player section for playback of stored files or streamed digital audio. In order to enable this function, it will be necessary to pair the sending device to the receiver as follows.

1. Open the Bluetooth settings menu on the smart phone or tablet (or other sending device)
2. Scan for Bluetooth devices and look for “adastra” in the list of available devices (ensure that the RM amp is powered on and within reception range)
3. Select “adastra” and the sending device should confirm that it is connected as an audio device
4. Play audio from the sending device, ensuring that volume controls are not turned down/muted
5. Turn up the USB/LN5 volume control on the amplifier to the required level
